

MOINUL HOSSAIN

Software Engineer

+8801732748262 | [Email](#) | [Portfolio](#) | [LinkedIn](#) | [Github](#)

Technical Skills

Languages: TypeScript | JavaScript | SQL | PHP | Java (Basics) | C | C++

Frameworks/Libraries: Next.js | React | Redux | Node.js | NestJS | Laravel | MySQL | Vitest | Jest | Sanity | JWPlayer | Twilio | Keycloak | Tailwind CSS | Bootstrap | SCSS

Other Tools: Git | Docker | Linux | Turborepo | Cursor (AI-assisted development)

Work Experience

TulipTech (Full-Time)

Software Engineer (React)

March 2025 – Present

Uttar Badda, Dhaka - 1212

Empathika (Care Solution Platform for Care Homes, UK)

- Contributed to the development of a digital care management platform used by Care Homes across the UK, focusing on enhancing Medication, Nurse, Pharmacy etc modules.
- Integrated **Titan (eMAR/PMR system)** for digital medication ordering, enabling seamless synchronization between care homes and pharmacies for real-time prescription tracking.
- Integrated an **AI-driven extraction service** to automate resident onboarding and medication scheduling by processing unstructured data and PDFs, reducing manual entry time by 50%.
- Collaborated on the **Pharmacy and Medication Management** modules, introducing features such as **medication approval workflows**, which improved operational efficiency by 30%.
- Enhanced the **Nurse Module** by developing advanced functionalities in the interactive **Body Map** feature—adding support for patch/libre placement and drag-and-drop movement.
- Participated in managing a large-scale **Turborepo monorepo consisting of 12 distinct applications**, optimizing code sharing and build pipelines to maintain consistency across multiple domains.
- Mentored junior developers on component design, state management with Zustand, and **unit testing basics with Vitest** to ensure high-quality, maintainable code standards.
- Tech Stack:** React, TypeScript, Ant Design, Tailwind, SCSS, Vitest, React Query, Zustand, Turborepo, Cursor

The World Games 2025 (Chengdu, China)

- Worked on a high-performance sports streaming platform serving over **4M+ users**, ensuring smooth and reliable live experiences during international events.
- Customized JW Player's Advertisement feature for showing Ad on specific media instead of app level which is by default
- Enabled instant live data synchronization across partner platforms using **Server-Sent Events (SSE)** for embedding in different federations.
- Implemented real time notification system by utilizing Supabase Realtime
- Worked closely with designers to enhance the CMS interface, improving usability and reducing support tickets.
- Tech Stack:** React, TypeScript, SCSS, Sanity, JWPlayer, NestJS, MongoDB, Supabase, Monolithic Architecture

ITLogiko (Remote)

Junior Software Engineer

June 2024 – March 2025

Jeshore - 7400

EIMS (Educational Institute Management System)

- Modernized legacy modules by migrating **class-based components to functional components** with Hooks, enhancing maintainability and aligning with modern React standards.
- Developed and maintained key modules for role-based access (Super Admin, Admin, Teacher, Student, etc.), ensuring secure and accurate data management.
- Optimized backend authentication services using microservice architecture, improving system reliability and scalability.
- Collaborated in Agile sprints via GitLab to deliver high-priority features and resolve bugs efficiently.
- Strengthened authentication, reduced login errors by 25%, and enhanced overall system stability.

ITLogiko Landing Page

- Redesigned the corporate website to improve SEO and brand visibility, increasing user engagement and inbound inquiries by 20%.
- Tech Stack:** React, TypeScript, Redux, Material UI, SCSS, PHP, Laravel, MySQL, Docker

Tirade Call Center

- Developed a comprehensive call center web application enabling audio, video, and conference calls, as well as real-time messaging and user management.
- Designed and implemented an event-driven architecture to handle concurrent communications efficiently, supporting 1K+ simultaneous connections with minimal latency.
- Enhanced user experience by implementing state synchronization across sessions, ensuring consistent call status and message delivery.
- Improved overall call reliability by 40%, reduced dropped-call incidents, and significantly enhanced customer support response times.

Ascalon Health

- Contributed to the development of a healthcare management web platform for tracking product compliance, performance, and maintenance across multiple facilities.
- Collaborated with backend teams to design APIs for managing product metadata, inspection logs, and health reports, ensuring seamless frontend-backend integration.
- Built data visualization dashboards for stakeholders to monitor product performance metrics, improving decision-making efficiency.
- Implemented responsive layouts and accessibility standards to ensure usability for healthcare professionals across devices.

- **Tech Stack:** React, TypeScript, Twilio, Keycloak, Redux, Redux Saga, WebSocket, Material UI, SCSS, Docker

Projects

stuRENT[Github](#) || [Live](#)

- Developed a room finding website using **Next.js**, **TypeScript**, **Tailwind CSS** etc.
- Created a fully responsive user interface with **filtering**, **Dark** and **Light** mode options, ensuring an optimal user experience across devices

Search Github User[Github](#) || [Live](#)

- Implemented manual login and social media authentication using **OAuth** protocols with Google, Facebook, and GitHub, ensuring secure and easy access.
- Enabled users to search for GitHub profiles and retrieve detailed information using **React**, **Context API** including repositories, followers, and languages used, utilizing GitHub's free API.
- Integrated **FusionCharts** to create interactive and visually appealing charts and graphs.

Daily Shop | A FullStack Ecommerce Website[Client](#) || [Server](#)

- Implemented registration, JWT authentication, and Google OAuth2 using **React**, **TypeScript**, and **Redux Saga**.
- Developed role-based access with **NestJS**, **JWT**, and **Bcrypt**; managed inventory with **TypeORM** and **MySQL**; documented APIs with **Swagger**.
- Utilized **Docker** for containerization and deployment of both frontend and backend applications.

Education

Northern University Bangladesh

Bachelor of Science in Computer Science and Engineering

August 2021 – October 2025

CGPA: 3.66 out of 4

Milestone College

Higher Secondary School

July 2018 – May 2020

GPA: 4.56 out of 5

Others

- Solved problems on competitive programming platforms, demonstrating proficiency in **Data Structures** and **Algorithms**.
